controlled development fuels savings

BP's ampm c-stores are recognized as one of the most successful franchise opportunities. Consumers give ampm high marks for quality, convenience, and value. WD Partners is working with BP to convert all US stores to the ampm brand, as well as contracting with dealers and distributors to transfer the ownership of properties.

Beginning in 2007, BP decided to franchise all of its remaining company-owned stores to dealers and distributors, giving them the ability to more effectively adapt stores to their local markets. WD Partners' cross-disciplinary team is designing, developing and building/retrofitting hundreds of BP and ARCO c-stores using a comprehensive set of master construction documents and a streamlined entitlements and permitting process.

results

Through a unique partnership with Bovis Lend Lease, WD Partners is the leading architecture and engineering firm for ampm in the United States. We have designed, built, and/or remodeled over 700 c-stores nationwide since 2000.
