## accelerated store development for complex design

TravelCenters of America (TA) is the innovator in the travel center industry, providing services to professional drivers and travelers for 30 years. Today, TA offers a wide variety of progressive services, including marble bathing facilities, wake-up calls, Wi-Fi areas, business centers, and full-service and quick-service foods, including Starbucks coffee. The largest network of full-service travel centers, TA plans to have 250 locations open by 2007.

WD Partners has been working with TA since 2000 to value engineer and rollout their prototype. WD Partners has provided site planning, concept site and building plans, construction documents, food service design and structural engineering for each location. TA appreciates our ability to execute quickly, and the personal attention we give their account.

### results

Utilizing WD Partners' multi-disciplinary team of engineers and architects has consolidated exterior architecture, structural, and electrical and mechanical engineering designs to reduce TravelCenters of America's per unit costs more than \$400,000.
